29 March 1955

Telephone Call from Mr. Hamilton, B of B:

"This is to inform CIA that the Bureau will approve the inclusion of an authorization request for construction of a new Headquarters building, including possible land acquisition, of \$50,000,000 in the Defense Construction Bill slated to go to the Congress about April 1, 1955.

"CIA is informed that the Bureau will approve a Fiscal Year 1956 supplemental appropriation or reappropriation request in the amount of about \$2,000,000 to cover 1956 architectural and engineering requirements.

"National Park Service is informed that the Bureau will approve the inclusion of an authorization request for extension of the George Washington Parkway to the Public Roads properties of 2.5 million in the same Defense Construction Bill. The language should make the authorization contingent upon an irrevocable CIA decision to construct its Headquarters building on the Langley site."
